1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is well known that this function is the arctangent function, i.e. $f(x) = \arctan x$. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is well known that this function is the arctangent function, i.e. $f(x) = \arctan x$. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is well known that this function is the arctangent function, i.e. $f(x) = \arctan x$. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations

$$\frac{dx}{dt} = f(x, y, z), \quad \frac{dy}{dt} = g(x, y, z), \quad \frac{dz}{dt} = h(x, y, z),$$

where f, g, h are continuous functions of x, y, z and satisfy certain conditions.

2. In the second part, we consider the case when the functions f, g, h are linear in x, y, z .

3. The third part is devoted to the study of the stability of the solutions of the system of equations.

4. In the fourth part, we consider the case when the functions f, g, h are periodic in t .

5. The fifth part is devoted to the study of the asymptotic behavior of the solutions of the system of equations.

6. In the sixth part, we consider the case when the functions f, g, h are analytic.

7. The seventh part is devoted to the study of the bifurcation of solutions of the system of equations.

8. In the eighth part, we consider the case when the functions f, g, h are piecewise continuous.

9. The ninth part is devoted to the study of the global behavior of the solutions of the system of equations.

10. In the tenth part, we consider the case when the functions f, g, h are discontinuous.

11. The eleventh part is devoted to the study of the qualitative behavior of the solutions of the system of equations.

12. In the twelfth part, we consider the case when the functions f, g, h are non-smooth.

GEORGE		
Alonzo	b. 1822 Vt.	761

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) under the conditions (2). It is shown that the system (1) has a solution if and only if the conditions (2) are satisfied.

2. In the second part of the paper the problem of the uniqueness of the solution of the system (1) is considered. It is shown that the system (1) has a unique solution if and only if the conditions (2) are satisfied.

3. In the third part of the paper the problem of the stability of the solution of the system (1) is considered. It is shown that the system (1) has a stable solution if and only if the conditions (2) are satisfied.

4. In the fourth part of the paper the problem of the asymptotic stability of the solution of the system (1) is considered. It is shown that the system (1) has an asymptotically stable solution if and only if the conditions (2) are satisfied.

5. In the fifth part of the paper the problem of the boundedness of the solution of the system (1) is considered. It is shown that the system (1) has a bounded solution if and only if the conditions (2) are satisfied.

6. In the sixth part of the paper the problem of the periodicity of the solution of the system (1) is considered. It is shown that the system (1) has a periodic solution if and only if the conditions (2) are satisfied.

7. In the seventh part of the paper the problem of the ergodicity of the solution of the system (1) is considered. It is shown that the system (1) has an ergodic solution if and only if the conditions (2) are satisfied.
